

# ITT, DST, and LSH Students!

## Would you like to...

- Develop basic (expressive) proficiency for an entire visual communication system in **ONE SEMESTER?**
- Increase your speechreadability?
- Learn (ITT, DST students) or brush up (LSH students) on phonetics?
- Find out what Cued Speech is?

## INT 4490: "Cued Speech"

### Two options for Spring, 2014:

- Mon/Wed 12:30-1:45pm (INT 4490.001, CRN # 19927)
- Mon/Wed 2:00-3:15 pm (INT 4490.002, CRN # 23866)

## What is Cued Speech...

In Cued Speech (CS), visual cues (hand gestures) are used with lip movements to convey all English sounds clearly. American Sign Language (ASL) is a distinct language. Some deaf people choose to use both ASL and CS. Use of CS may facilitate English literacy.

## Did you know...

- Cued Speech was developed at **Gallaudet** as a visual communication system to improve **literacy** among deaf children.
- Deaf children using Cued Speech develop the **SAME PHONEMIC AWARENESS** as hearing children of the same age.
- As awareness of possible **literacy benefits** of CS increases among parents with deaf children, so will the demand for CS interpreters in Florida (this has already begun!)
- Only a few service providers in Florida who work with deaf children have this skill

**Learn Cued Speech and enhance your marketability!!**
