

# SLP (2<sup>nd</sup> year) and AuD (3<sup>rd</sup> year) Students!

Looking for an elective? Are you interested in...

- Communication options for families with deaf children?
- Learning the basics of an entire visual communication system in ONE SEMESTER?
- Brushing up on phonetics (broad transcription) skills?
- Discovering a valuable clinical tool?

**SPA 6930 (CRN #12194):**

**"Cued Speech and its Clinical Applications"**

**Spring, 2013    Thurs 4:10-6:55pm**

## What is Cued Speech...

In Cued Speech (CS), visual cues (hand gestures) are used with lip movements to convey all English sounds clearly. American Sign Language (ASL) is a distinct language. Some deaf people choose to use both ASL and CS. Use of CS may facilitate English literacy.

## Did you know...

- Cued Speech was developed at **Gallaudet**
- Deaf children using Cued Speech develop the **SAME PHONEMIC AWARENESS** as hearing children of the same age.
- As awareness of possible **literacy benefits** of CS increases among parents with deaf children, so will the demand professionals who are familiar with it
- Only a few professionals in Florida who work with deaf children have this skill

**Learn Cued Speech and explore its applications!! In this class, we will**

- **Learn firsthand about the evidence base for Cued Speech**
- **Find out how it is currently being used by SLPs \*and\* audiologists**
